

The North Florida Kart Club will now use wet weather tires. The following policy applies to all classes including Kid Karts.

- Competitors must mount rain tires when the race director has declared wet conditions. Wet weather racing condition rules will be in effect when the Race Director declares such conditions. Teams will be allowed up to 20 minutes to do so.
- Wet Track: Raceable wet conditions are defined as a wet track but without deep standing water or heavy running water on the track surface. Heavy rainfall, and or the presence of lightning, or other severe weather in the area are not acceptable racing conditions.
- When wet weather conditions are declared, ALL competitors must mount rain tires. Only production-type rain tires that have been manufactured specifically for wet weather racing conditions will be permitted. Competitors may not modify, groove, etc.
